

Barcode Essentials™

with Altiris™ Barcode Solution

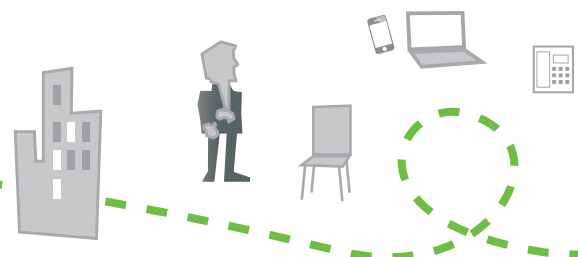

Fixed Asset Management Any Location, Any Time with your iPhone or iPad

- ✓ Cost Effective Tools
- ✓ Less Training
- ✓ Fully Wireless
- ✓ Always On Hand

Making Fixed Asset Management Affordable, Pervasive and Easy to Manage

Deploying and managing asset teams has never been easier. With Barcode Essentials™ for iPhone, organizations can say goodbye to expensive single-purpose scanning hardware and start leveraging the great scanning and processing capabilities that make iPhones and iPads serious day to day asset management tools and more than just communication devices.

With less time required to train, deploy and manage asset teams, asset management tasks can be carried out accurately and effectively, keeping your Altiris™ asset data base (CMDB) up-to-date and saving time and money.

Available on the
App Store

All the tools you need in your pocket

Features: Fixed Asset workflows at your finger tips

Asset Managers can be confident that their team members have the capabilities and data they need, with data and feature access determined by the profiles set by the Altiris™ administrator at the server.

With Barcode Essentials™ there's no more need for lengthy preparation of specialised devices or team co-ordination for deployment. Users simply synchronise wirelessly with the Notification Server and commence their asset tasks.

- Scan & Discover
- Receive into Stock
- Create New Assets
- Search
- Inventory Locations
- Re-Assign Assets
- Retire and Dispose

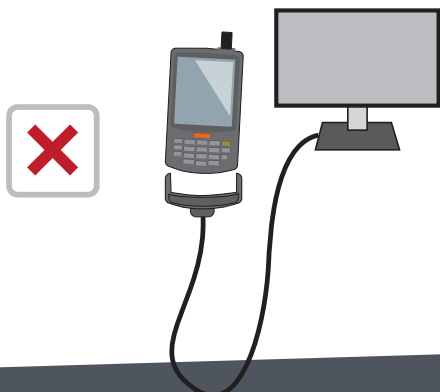

Fast and Easy to Deploy and Synchronise with CMDB

Barcode Essentials™ can be downloaded and installed directly onto the device from the Apple App Store, utilizing the full wireless capabilities of iPhone.

Using standard credentials to login to the NS and a valid Altiris™ Barcode Solution license, asset team members can complete their asset tasks and send updated asset records directly to the CMDB without any need to cradle or tether the device.

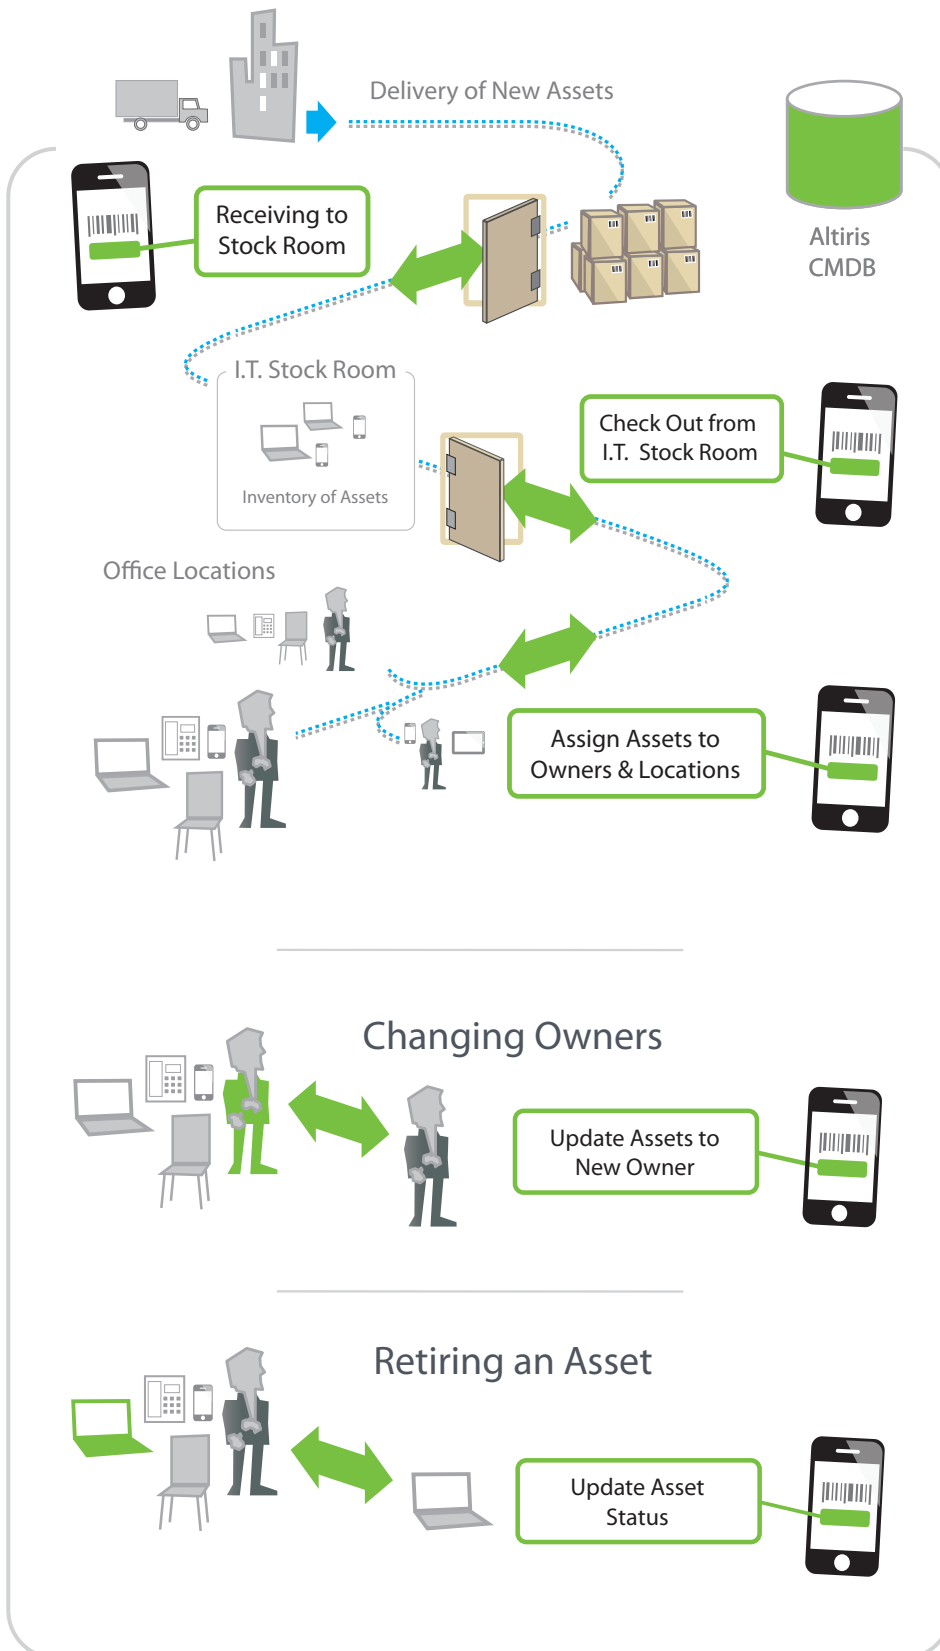

Deploy & Synchronise Wirelessly to Any Location, Any Time

Easy Workflows to Fast-Track Asset Control

Asset Creation (Receiving) and Assignment

Receiving to Stock Room

The point that new assets enter the organization is the right time to scan or identify them and mark their location and status, before being distributed for end use.

Checking out items

Assets are then checked out from Stock Room for distribution within the organization. Just scan and update each asset's location and status as they depart.

Assignment to Owners

Once an asset reaches its intended location its owner can be confirmed and updated for accurate reporting and cost center allocation.

Re-Assigning Assets

Where assets need to be re-assigned from one owner to another, simply set the new owner detail and scan each asset to be updated.

Asset Disposal

End of Life for an asset has direct implications for ledger accounts, depreciation and insurance. Scan and update the status and final location.

Easing the Hardware headache

Conventional Devices

- ✗ Expensive capital spend
- ✗ Limited hardware trial options
- ✗ Singular purpose
- ✗ Requires user training
- ✗ Desktop / tethered management
- ✗ Return-to-base provisioning
- ✗ Specialized servicing

iPhone Devices

- ✓ Priced for consumers
- ✓ Risk free hardware trial using any iPhone and Barcode Essentials™
- ✓ Multi-purpose use
- ✓ No hardware training required
- ✓ Wireless management
- ✓ Wireless (Over the Air) provisioning

Benefits

Barcode Essentials™ is the easiest, least expensive and most practical entry point to Fixed Asset Management for organizations leveraging Altiris™ AMS and ITMS suites.

Barcode Essentials™ turns commonplace iPhone devices into powerful Asset Management tools, for use anywhere, anytime with powerful in-built scanning and imaging capabilities and full wireless synchronisation with the Altiris™ Configuration Management Database (CMDB).

- ✓ Meet compliance requirements
- ✓ Reduce unnecessary Tax and Insurance Costs
- ✓ Maintain accurate, up-to-date records
- ✓ Leverage existing iPhone hardware
- ✓ Easy to access, Fast to work with
- ✓ Flexible, wireless and truly mobile

System Requirements

Barcode Essentials™ is for use with Symantec Asset Management suite and requires users hold a valid license of Altiris™ Barcode Solution 7.1 SP1, SP2 or SP2 HF1 from Symantec to synchronise.

Already Using Altiris™ Barcode Solution?
